Template Overview

Template Purpose

The goal of this document is to provide a helpful, easily editable template for UBC students, staff, and faculty. Several presentation slide classes are available.

This is an example of a `.paragraph-content` class slide. Code can be visually represented using backticks: ``.

How to Edit

This template is a Quarto presentation. It should be edited through RStudio.

I would strongly recommend using `editor: source` rather than `editor: visual`. Managing classes becomes very clunky in RStudio's visual editor.

Roadmap

This is an example of a .roadmap class slide. Sections can be separated with `class = "break"`.

Objective 1

1. Slide 1
 2. Slide 2
-

Objective 2

1. Slide 1
2. Slide 2

Thank you!

This is an example of a `.thanks` class slide.

I appreciate your interest in this template.
