

THE UNIVERSITY OF BRITISH COLUMBIA

UBC Presentation Template

Template Overview

Template Purpose

The goal of this document is to provide a helpful, easily editable template for UBC students, staff, and faculty. Several presentation slide classes are available.

This is an example of a `.mst` (Main Slide Type) class slide. Code can be visually represented using backticks: ``.

How to Edit

This template is a Quarto presentation. It should be edited through RStudio.

I would strongly recommend using `editor: source` rather than `editor: visual`. Managing classes becomes very clunky in RStudio's visual editor.

Roadmap

This is another example of a `.mst` class slide. Since the `.qmd` document is all Markdown (with some HTML to help with style!), slides can be edited quickly.

Lists can be made with - `Element` or `1. Element`.

Subheading font can be designated with `**Subheader**`.

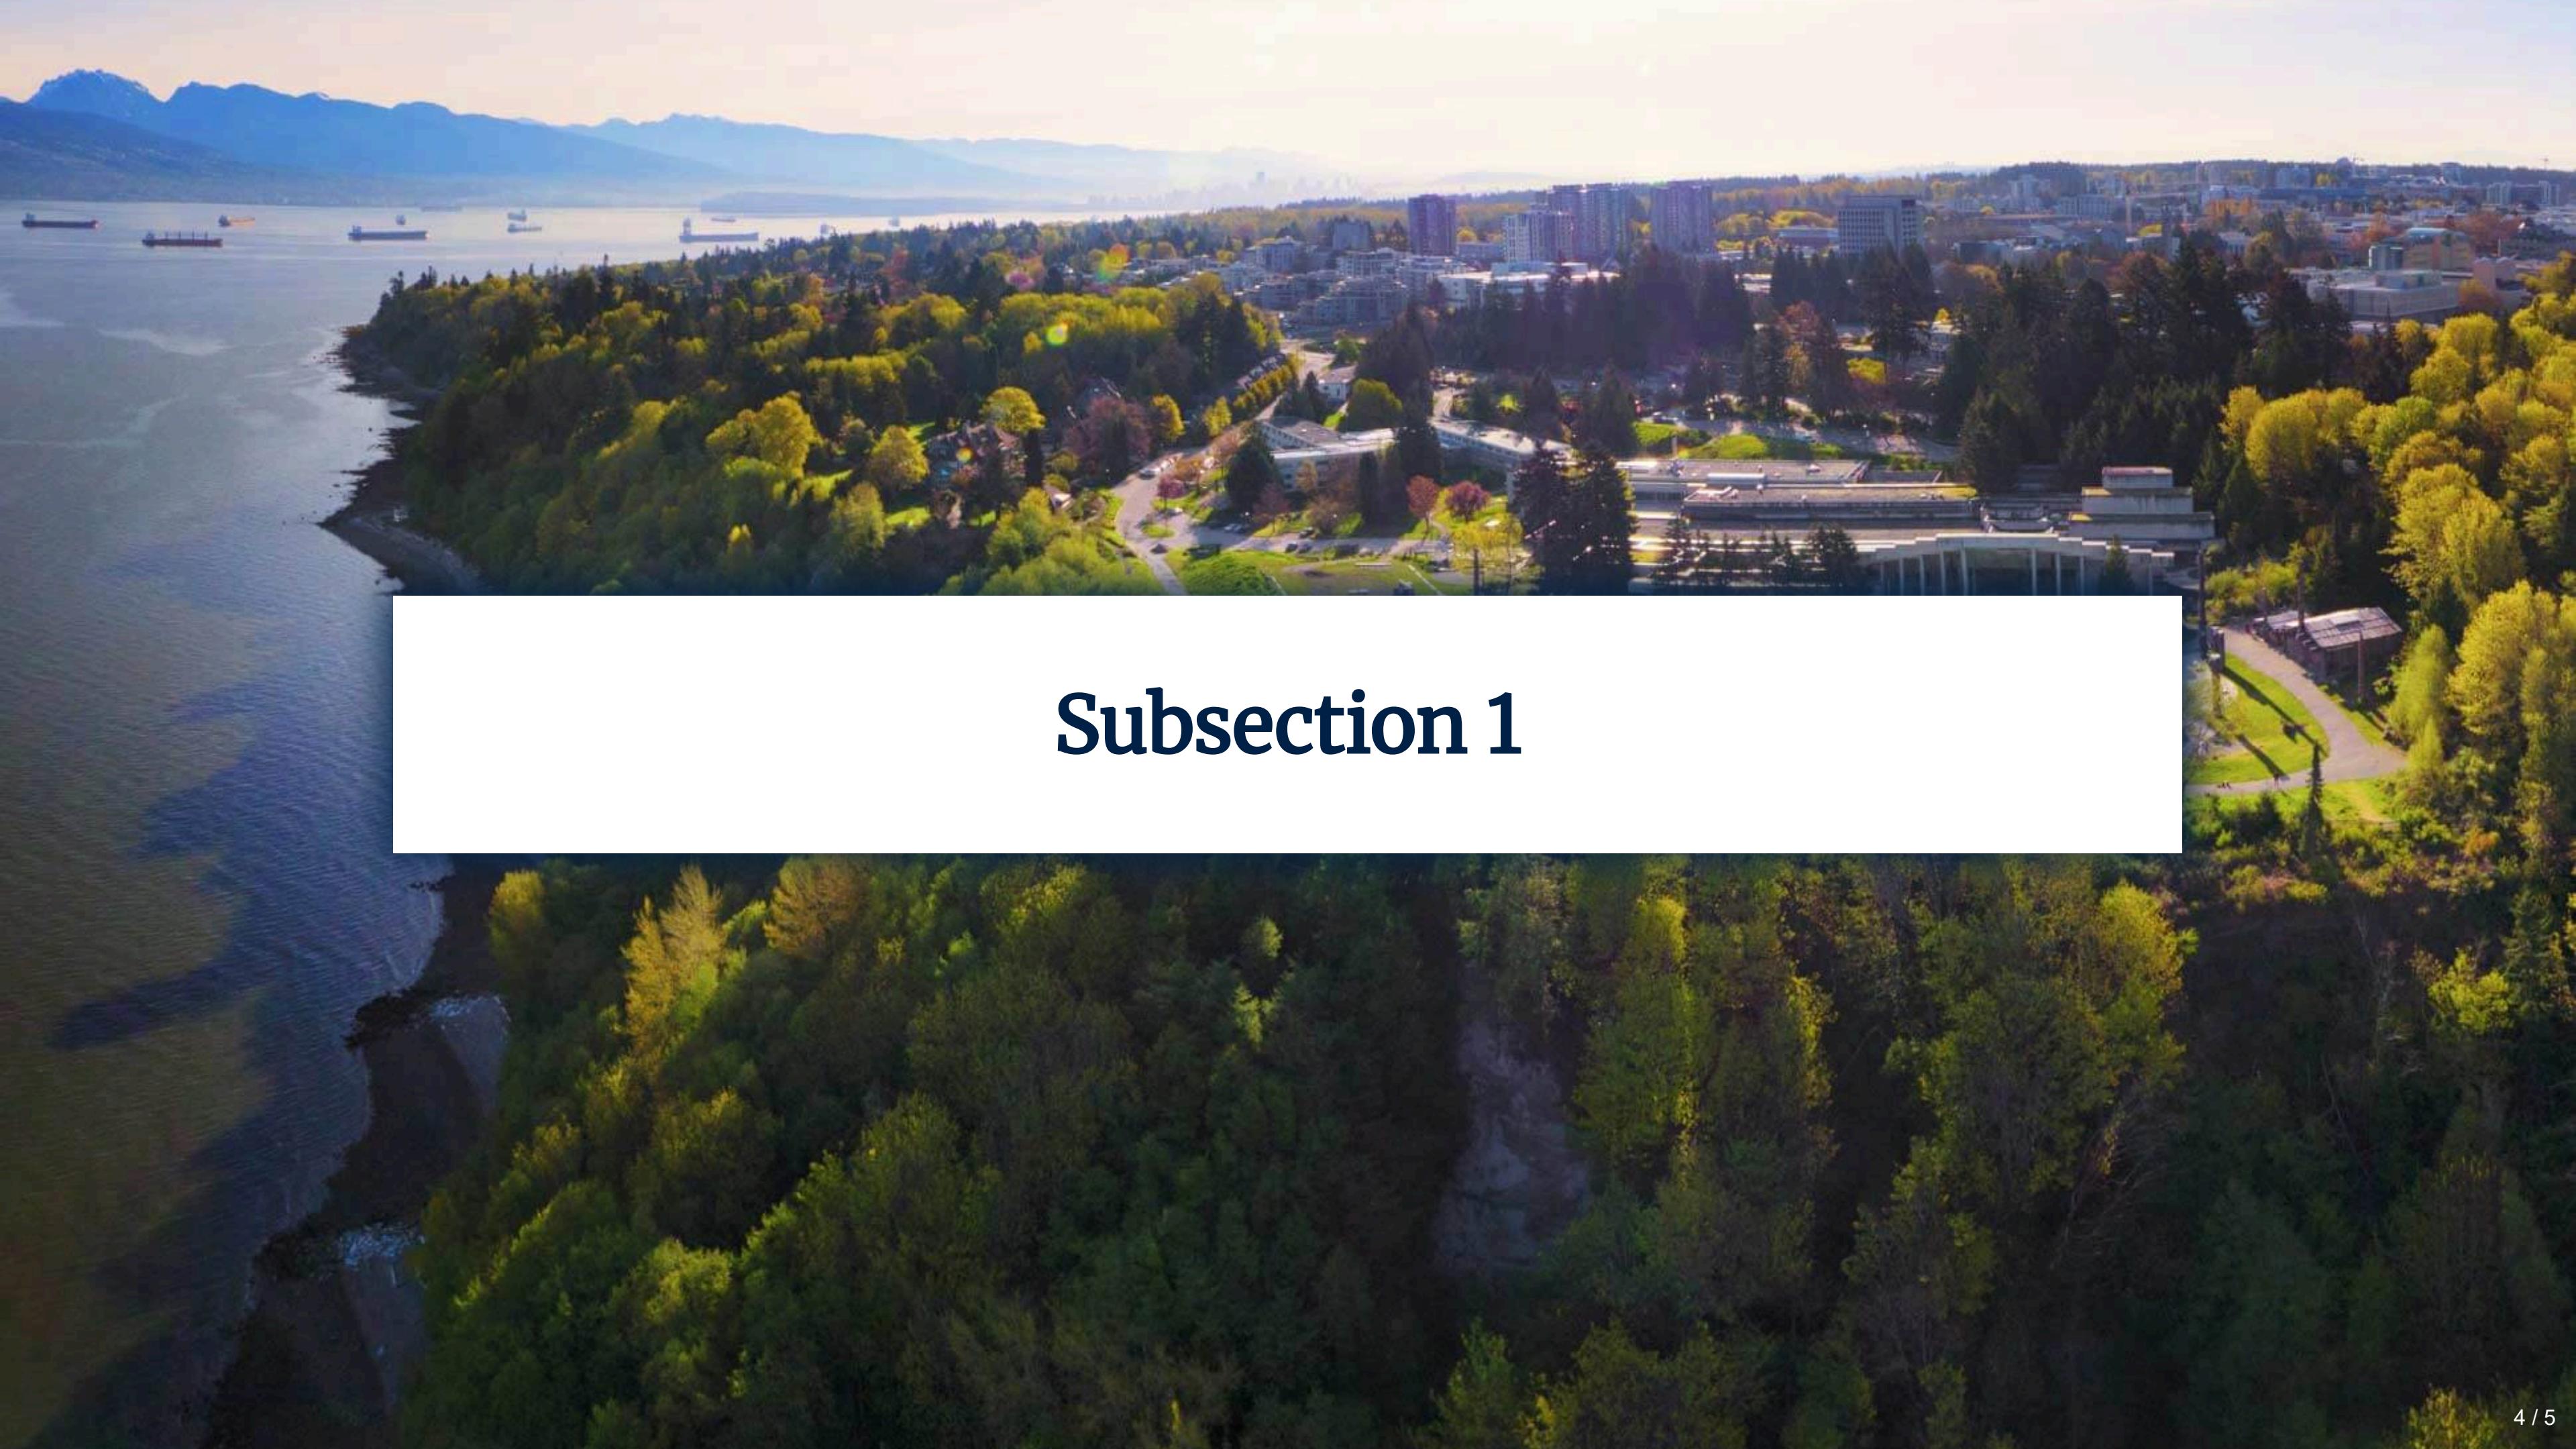

To make the blue section dividers, use `<div class = "break">
</div>`.

Ordered List

1. Element 1
 2. Element 2
-

Unordered List

- Element 1
- Element 2

An aerial photograph of a coastal city, likely Vancouver, Canada. The image shows a dense urban area with numerous buildings, roads, and green spaces. In the foreground, there's a large industrial or institutional building complex. Beyond the city, a body of water with several ships is visible, and a range of mountains is in the background under a clear sky.

Subsection 1

Thank you!

This is an example of a `.cst` (Centered Slide Type) class slide.

I appreciate your interest in this template.
